

DNG-A

Product video

Fire hook is one of the most common breaking tools in fire fighting and rescue operation. Rescuers can choose different heads according to the different needs. The fire hook can not only replace the old tools, but also can save the space of the fire vehicles. It contains fire components, claw barrow kit, fire axe kit, hook kit, fire hammer kit, tri-rod shovel kit, fire saw kit, high-altitude shear kit, handle rod and elongation rod.

**Claw barrow kit**

Used for clearing of on-site collapse, obstacles, toxic substances and debris after the disaster.

**Fire axe kit**

It can cut, chop, pry, open doors and windows, pry off the floor, beams, cabinets, ceilings, sliding wall panels, railings and cut material. Q235 and diameter 4mm round steel.

**Fire hammer kit**

Smash the windows and doors of buildings, smoke and ventilate, and hammer objects with carbon materials.

**Technical parameter**

Name	Dimension(mm)	Weight(kg)
Claw barrow	178 × 100 × 83	1.2
Fire axe	235 × 100 × 32	1.1
Hook	250 × 93 × 40	1.0
Fire hammer	140 × 130 × 60	1.3
Tri-rod shovel	200 × 150 × 50	1.1
Fire saw	308 × 110 × 30	0.6
High-altitude shear	295 × 170 × 30	1.2
Handle rod	φ 32 × 1000	0.9
Elongation rod	φ 32 × 1000	1.3
Total box	1100 × 375 × 125	6.5
Total weight		10.5

**Tri-rod shovel kit**

Clear up the debris and obstacles on the spot, it can remove and lighten the hexagonal bolt, cut and saw objects, shovel head and handle can be folded.

**Fire saw kit**

It can cut off large branches of trees or objects burning in the fire and can be used with high-altitude shears.

**Hook kit**

Demolition ceiling, hook wire, etc.

**High-altitude shear kit**

It can cut high branches and wooden falling objects, collapse and components.

**Rod kit**

The rod head is connected with the tool head by the quickcoupling, which can be flexibly and quickly combined with the matching breaking tools on the spot, and has the advantages of good insulation, high strength and light weight.

It can be used to cut iron plates or car protection glass within 3mm. The cutting head can be extended or used alone.

**Technical parameter**

Item	Specification
Product name	Multi-functional waist axe
Dimension (mm)	300 × 140 × 20
Package dimension (mm)	308 × 140 × 20
Min. arm of force (mm)	405 × 225 × 100
Weight (kg)	1.90
Min. cutting radius of generation (mm)	290
Max. cutting radius of generation (mm)	0.96/0.8
Max. cutting radius of generation (mm)	300
Max. exert force (N)	400
Max. opening distance of cutting head (mm)	9
Max. opening distance of cutting head (mm)	4

**Axe blade**

It can be used to cut wood or iron and iron wire within 6.5mm.

**Nail puller**

All kinds of nails can be prised from wood.
